

## 2. Timeline Presentation

In this lesson plan, students will use Task FM to create a reminder of tasks they must complete in order to finish their timeline presentation.

The students will have to learn how to use Task FM, create a reminder of tasks to be done, create a timeline of a person's life during World War II, create a visual aid, and finally create a presentation.

Objective	Students will be asked to make up a legend of discovering America. Based on our class discussions and their own research each student will create a time line of events that could possibly have happened to a person who reached the New World. Students will then give a short presentation to their classmates describing their made up legend. Students will also be required to use Task FM to create and submit a reminder of things required to complete their project on time.
Learning Environment	The students will work individually. They will use Task FM on a lab computer with the internet. They will also be able to do research on their topic in the library.
Types of Students	The students will be in secondary education and in a history class.
Standards	United States History USH.5.6
Materials	Lab computer with internet access, mobile-phone, information about the first Americans and explorers from Europe, and Task FM.
Procedures	<ol style="list-style-type: none"><li>1. Students will be provided with a list of legends and asked to pick one of them.</li><li>2. Students will also be given a quick lesson in how to use Task FM to create to do lists of reminders.</li><li>3. Students will then be asked to use Task FM to make a list of things the need to accomplish in order to complete their report on time.</li><li>4. The teacher will block off several days of library and computer lab time in order to give the students the chance to research using school materials.</li><li>5. Students will then create lives, families, businesses and other specifics about the legend they have chosen.</li></ol> <p>A timeline of the legend must be included in the presentation.</p>
Application	After learning how to use Task FM, the students will use the program to list the things they need to accomplish in order to complete their report on time.
Evaluation	Creativity of a legend invented and accuracy of possible life events = 20 points Visual aid (PowerPoint, poster, puppet show, etc...) = 30 points Presentation skills (looking at audience, language, keeping audience hooked) = 35 Two-question evaluation about their classmates' projects = 10 points  Total = 100 points
