

	Shapes
<b>Objective</b>	Students will work in small groups and pick a shape and find different ways to share its look with the class.
<b>Learning Environment</b>	Students are in a computer lab with internet access. There are 4 students working together at neighboring computers so they are grouped closely together.
<b>Types of Students</b>	The students are in kindergarten and will be working with teacher's aides so they know how to use a computer
<b>Standards</b>	Math: <ul style="list-style-type: none"> <li>• K.4- Geometry</li> </ul>
<b>Materials</b>	computers
<b>Procedures</b>	<ol style="list-style-type: none"> <li>1. Students will get into small groups of 4 or 5 and pick a certain shape that no other group has chosen first</li> <li>2. They will work with the teacher's aide to create a screencast on how to draw the shape.</li> <li>3. Using internet access, students will find other objects that possess that certain shape</li> <li>4. The class will watch as the group of students present their shape and the other objects that have that shape.</li> </ol>
<b>Application</b>	The students will present to the class to show the different basic shapes and the things that they see each day that are in that shape.
<b>Evaluation</b>	The students will either receive all or no points for completing this assignment. They will either be rewarded 5 points or no points, depending on if they finished the assignment or not.
