

College Vet./Animal Science Class

| | |
|-------------------|---|
| Overview | Students will learn the external signs of illness and disease in animals, by seeing a picture of the animal and point it out. |
| Objective | Students will be able to identify external issues with an animal and identify exactly what it is. |
| Standards | The lesson cover the Indiana State Standard for Agricultural Education, Animal Science: AS.D, AS.D.2, AS.D.4 |
| Material | <ul style="list-style-type: none">• Photo of animals with external parasites/diseases/injuries.• A computer with internet access to Splashup.com |
| Procedure | <ol style="list-style-type: none">1. Upload a picture on Splashup.com2. Students must circle the problem and open a text box and identify the problem. |
| Evaluation | Students' photo will demonstrate whether or not they can identify certain diseases/parasites/injuries. They will be graded whether they found the problems. |
