

## High School Horticulture Lesson Plan

Objective	The objective of this lesson is to give students a better understanding of how to use social networking for our class greenhouse project. By the end of this lesson students will know the benefits of using a social networking site like 6 Rounds to promote there business. They will also know how to create there own profiles.
Materials	Handout Computers (with internet connection)
Procedure	<ol style="list-style-type: none"><li>1) The students will be given a handout describing 6 Rounds and the benefits of using social networking for a business.</li><li>2) Play the YouTube video that step by step explains how to use the program.</li><li>3) Each student will partner up and together work on building a site for the greenhouse business.</li><li>4) After designing the site the students will write a one-page report on how they plan on utilizing the features of 6 Rounds.</li><li>5) After I choose the three best sites the class will vote on their favorite and will use it for the greenhouse. Whatever group made the site will receive three extra credit points.</li></ol>
Assessment	The students will receive credit for completing the paper and participating in the building of the site. As long as they have turned in the paper and put in there half of the work on the site they will receive the full ten points for the day.
