

## Psychological Study

<b>Students</b>	Each student will be in post secondary education.
<b>Overview</b>	After this lesson, each student will be able to complete a psychological study using 6grounds.
<b>Objective</b>	To teach students how to use 6grounds to complete a psychological study on how well people listen to information, and retain information, when taught from somebody on a computer screen.
<b>Materials</b>	A computer with access to the internet, a web cam, and a microphone.
<b>Procedure</b>	<ul style="list-style-type: none"> <li>• Get into groups of two</li> <li>• Decide on how to complete the evaluation and who you are going to evaluate</li> <li>• Evaluate at least fifteen people using 6grounds</li> </ul>
<b>Evaluation</b>	Turn in the information gathered and it will be graded using the rubric provided to the students at the start of the project.
