How can Slideboom be used across the world?

In other countries, Slideboom can be used just as it can be here. Viewers from other countries, such as China, can view presentations people in America made. It works the same for every country.

This can be very valuable for everyone involved because you don’t have to worry about what version of Microsoft or presentation software you have.

This can definitely tie into how Slideboom can be used in a business setting. If more people knew about Slideboom and all it has to offer, businesses wouldn’t have to have their employees travel across the world as much as they do now. Instead, employees could just create a presentation that explains what they’re proposing and upload it to Slideboom for others to see.

Slideboom can be used for lots of things, but its main use is to share presentations all over the world. Users can create a Power Point Presentation

**Web 2.0 Tools - Slide Boom**

**What is Slideboom?**

SlideBoom can be used for many things, but its main use is to share presentations all over the world. Users can create a PowerPoint Presentation using the Microsoft application, and then upload it to share with people all over the world. Viewers are encouraged to comment on the presentations they see, so SlideBoom creates a huge opportunity for receiving feedback on your presentations.

**How can Slideboom be used?**

SlideBoom is a public website designed for anyone to upload PowerPoint presentations to share with anyone. Uploading a presentation will make it available to any user to look at and leave comments. SlideBoom is a great way to upload your projects or presentations, and even though it is similar to other websites, SlideBoom will convert your presentations without any features being loss. It is useful for businesses, schools, and for and for sending to other countries.

One of the most unique features about Slideboom is that you do not need to save the presentation

**History of Slideboom**

The Web 2.0 Tool SlideBoom was created by iSpring Solutions, Inc. iSpring Solutions, Inc. is a software company concerned with developing the best media software available for use by global markets. There are 3 main locations for Slideboom, which include Russia, India, and the United States.

The CEO of the company as pictured above, Yury Uskovm, began working on SlideBoom in 2001. However, major developments for this tool did not commence until May of 2007, and the final completion of Slideboom was not until 2009.
