

# CATEGORIZING ANIMALS

---

## Objectives

Students will prove that they can use their knowledge of categorizing animals. They will complete an assignment and then compare it with a peer over DropVine.

## Materials

- Computer
  - Internet
  - Word Document
  - DropVine

## Procedure

- Students will start a Word document on the computer.
  - They will first write the differences between the different categories of animals.
-

- 
- Then, they will use the Internet to find 3 picture examples of each animal category.
    - Mammals
    - Birds
    - Reptiles
    - Amphibians
    - Fish
  - Once they have finished these tasks, they will find a partner and use **DropVine** to compare each other's work. (Must check with teacher upon completion before comparing on DropVine)

## Assessments

The teacher will also use **DropVine** to grade the assignments.

## Rubric

Students will receive their grade based on the details and the correctness of their assignment.
