

Internet Lesson Plan

Elementary Grades 4-5

Overview	The purpose of this project is to let students understand searching information on the internet and sharing it with others in a group.
Objectives	After completing this project students will be able to: <ul style="list-style-type: none">• Search with popular search engines• Use Smub.it to share bookmarked websites with others in their group.
Standards¹	Standard 1: Science and Technology 5.1.4 Give examples of technology, such as telescopes, microscopes, and cameras, that enable scientists and others to observe things that are too small or too far away to be seen without them and to study the motion of objects that are moving very rapidly or are hardly moving.
Material	<ul style="list-style-type: none">• Computer
Procedure	<ol style="list-style-type: none">1. Explain what we are going to do on the computer.2. Demonstrate the use of Smub.it.3. Place students in groups.4. Let groups pick a topic (dogs, space travel, etc.)5. Have students each search one aspect of their topic.6. Have students bookmark the website they find most useful using Sumb.it.7. Have the students share their bookmarks with the other people in their groups.
Evaluation	Students will be given a short quiz of the material and basics on how to use Smub.it. They will also be graded on the ability to bookmark and share at least one website on their own.
