

# Do you share website links with your friends?

Was it always the best way to show them what you were trying to?

- Start using Zazna, and the next time someone clicks on your link, they will not only see the **page** that you were browsing, but also the **selection** you made with your mouse.
- Every selection made on Zazna is **bookmarked**, so you not only can browse your selections later, but even search for **related selections** of other users as well.
- Zazna is also very valuable tool at work. You can mark your selection **private** if you like, and discuss it with just the people you've sent your link to.

---

- 1 **Bookmark fragments of webpages**
- 2 **Link to bookmarked selections**
- 3 **Browse selections without signup**
- 4 **Retain selection's original context**
- 5 **Comment on fragments of pages**
- 6 **Find interesting selections**

## Why Zazna?

---

### Zazna makes sharing information over the internet much easier:

- Rather than just copying and pasting text, Zazna allows users to copy and paste everything the user feels is important
  - Including graphics, images, text, headings, etc.
- Zazna allows users to not only send text, but context as well
- Enables users to show their friends, coworkers, students, instructors, etc, exactly what they are looking at
- Zazna allows users to publish clippings and posts to services such as Facebook, Reddit, Digg, and Twitter
- Zazna provides a URL to the user for every clipping, so the user can easily share the clipping over instant message or email
- It also indexes everything that you save and creates a "bibliography" on your Zazna account

## How Do I Use Zazna?

---

### Using Zazna is very simple:

1. Highlight the content you want to share
2. Click the "Save to Zazna" bookmarklet and then name your selection
3. Log in to Zazna. It will provide you with a direct link to just the content you deemed important.
4. Now, share that link with whomever you want!

So, **JOIN NOW** and make your information sharing that much easier!
