Lesson plan – Swedish dialects

Objective

The objective is to learn the students about different Swedish dialects used in different parts of Sweden using Mulaboration.

This lesson can be used for students within the age of 13-18.

Materials

Computers with internet connection

Sound recorder (optional)

Literature

Procedure

1. Assign the students into small groups with 2-4 students in each group and then assign each group with a dialect they are to work with.

2. Explain to the students that they are to work with their dialect by gathering information about it where it is used, by how many, influences and characteristics. They are also to collect a sound sample of the assigned dialect.

3. They are then to sign up for a mulaboration user account, create a group for their assigned group and post the gathered information in the group’s wiki page.

4. When they are done the whole class is to make a common group for the whole class where they post and share their work for each other on the group’s wiki.

Evaluation

The teacher is to have full access to all groups and follow their work, give feedback and evaluate it.
