### Objectives

Following this activity, students will:
- Be able to distinguish different kinds of leaves and the trees they came from.
- Be able to name leaves and trees based on given characteristics

### Standards

N/A

### Procedures

1. Prior to the lesson, the teacher needs to post pictures and charts of the different types of leaves to the Mulaboration site, the tree names, notes on trees and leaves, and practice quizzes as well.
2. Explain to the class that there are different characteristics of leaves that enable you to determine what tree it has come from.
3. Each student will need to study the leaf characteristics chart and tree names chart that are posted on Mulaboration.
4. Along with studying both charts, students will need to copy down notes that will be posted on Mulaboration as well.
5. Pull up the pictures of the leaves in class and discuss the characteristics of each one.
6. After the discussion and studying of the pictures and charts, allow students to take the practice quizzes to prepare them for the final quiz.
7. Next class you will meet at a forest on campus to see that your students are able to
