

Scientific Method

Grade Level: Post Secondary

Overview	The students will design an experiment, which involves using Decing to have people vote on a topic.
Objective	The students will design an experiment, after designing their experiment the students must use the scientific method and Decing effectively.
Materials	Decing Computer Other materials depending on the students experiments
Procedure	<ol style="list-style-type: none">1. The teacher will explain to the students that they will need to design an experiment.2. The students must use the scientific method (Observations, Hypothesis, Prediction, Experiment) effectively and they must use Decing in their experiment.3. The students may choose any topic they feel like but the topic must be school appropriate.4. The students will get two weeks to complete the experiment.
Evaluation	The students will have to turn in evidence that they completed each step of the scientific method and they have show evidence that they incorporated Decing into their experiment.
