	Lesson Sequence	Organization	Equipment/Assessment
	<p>Introduction: First I will explain the premise of the project. By showing them the website I had already made and how to make their own wiki using intodit, And how to make a post on other classmates web pages</p>	<p>All students will sit in their assigned seats at a computer so I can walk around and assess the students.</p>	<p>Computer for each student</p>
	<p>Practice Phase: During the rest of class students will design their wiki and follow the rubric that is in the syllabus they got at the beginning of the semester.</p> <p>Also they will have to add all the class mates to their wiki by sending an invitation from their page.</p>		
	<p>Closure: I will walk around to check their wiki and make sure they have it done. And for homework they will all have to go to at least three of their classmates wikis and make a post telling what they liked about them and how they think they could make them better.</p>
