

Lesson plan on wiki weather

Name: brad		School: Elementary		Grade: 5 th		Class Size: 20	
Lesson Focus: how to use a wiki			Course Instructor:		Date:		Lesson No.: 1
Facility: class room			Equipment: computer with a projector				
NASPE Standards	Student Performance Objectives: <i>By the end of the lesson, students should be able to:</i> use a wiki and make a post on a class discussion						
Teacher Performance Objectives: <i>During the lesson, the teacher will:</i> assess students by checking posts on the internet							
Special Student/Safety Considerations: if students do not have a home computer they will have to make arrangements so they can make their posts							
References: class book on science							
Time	Lesson Sequence	Organization	Equipment/Assessment				
	<p>Introduction: start off by telling students what is a wiki and how we will use them in this class. Also check on how many students have a home computer with access to the internet.</p>	<p>Students will sit at their desks and take notes on how to use wikis</p>	<p>Paper and writing utensil</p>				
	<p>Practice Phase:</p> <p>During class I will ask students question on how they could use a wiki. Also the topic they will be discussing on the internet will be weather. So they will have to read the chapter in the book on storm systems and how clouds are formed. I will check for understanding on the chapter and inform them they will have to answer question on the wiki I have made for the weather unit.</p>	<p>Students will sit at their desks and take notes on how to use wikis</p>	<p>Same paper, writing utensil, and their books.</p>				
	<p>Closure: in closing the day I will give them the web page address show them again how to make a post so they can answer the question on my wiki.</p>		<p>Hand out paper with the wiki address and an over view of how to use the wiki so parents can help if students have trouble.</p>
