

# Psychology 120

Objectives	Convey to students how synapses in the nervous system are able to transmit messages between one nerve cell and the next.
Students	Students in this course will be of the collegiate level and preferable have some experience in psychology classes.
Materials	A computer with access to the internet.
Procedures	<ul style="list-style-type: none"><li>• Outside of lecture students would be required to post different information they have found about different mental disorders.</li><li>• There would be a chat discussion below each of the different disorders that students would be required to post comments.</li></ul>
Evaluation	Have a short quiz at the end of the next lecture using the CPS clickers that will be for a small percent of the total CPS score from the semester. Scores will be posted following the class on the Stixy webpage.
