Vocabulary Flash Cards
High School Technology Course
Approximately 60 minutes

Overview
Students in a technology course will read sections of the textbook, and find words that seem unclear to them. They will use Lexipedia.com to find and understand the meaning of those words, and how they are relevant to the text and current lesson.

Objective
Students will:
- Read the assigned technology text sections
- Find and research the new technological terms

Standards
High school computer technology course

Materials
Students will need:
- Textbook
- Computer with internet access to use Lexipedia.com
- Pen or pencil
- Notebook
| Procedure | Students will read the assigned sections of the text  
|  | 2.) Students will write down words that they are unfamiliar with or words that they do not know the meaning of (at least 8 words)  
|  | 3.) Students will use Lexipedia to find connections between technology terms  
|  | 4.) Students will write down the definition, two synonyms and how each term relates to current lesson  
| Evaluation | Students will turn in their work, one week after completion of assignment. They will then have a quiz on the terms of the section and must complete it with 80% accuracy. |
