# Overview
This lesson is aimed towards future teachers in the school of elementary education at the collegiate level. This lesson allows for future teachers to create a lesson plan to give to students in the classroom they are currently observing. Future teachers should give a lesson on appropriate content and give the students a quiz at the end of the lesson.

# Objectives
After performing a lesson in the classroom, future teachers should instruct a classroom of students on the lifecycle of a butterfly by completing an activity and evaluation quiz.

# Materials
- A PowerPoint of the different lifecycles of a butterfly
- Butterfly Patterns made of construction paper
- Small Bean (Egg)
- Spiral Pasta (Caterpillars)
- Shell Pasta (Chrysalis)
- Bow Tie Pasta (Butterfly)
- Crayons/Markers
- Glue
- Access to a computer for evaluation quiz

# Procedures
- The future teacher should create a lesson plan on the lifecycle of a butterfly
- Using the materials given, create an activity that is appropriate for this topic.
- Once the lesson is complete, the future teacher should allow the kids plenty of time to take part in a chosen activity.
- Following the lesson and activity, the future teacher should give his/her students a quiz she created on mystudiyo.com
- The future teacher should evaluate how his/her students did by looking at the scores of the quizzes.
