Linking Existing Content

☐ Step-by-Step

☑ In Learn, content created in one of the part can be linked to in another part of the course. To get started, enter a content area and find an item to link to. For this tutorial, the Reflection 1 assignment created in E13-Adding an Assignment will be linked to on the Week 1 Learning Module page from its original location on the Course Content page.

☑ Click the Week 1 Learning Module link on the course menu, which was created in E03-Adding a Menu Item/Renaming a Menu Item. Then click the Week 1 Learning Module link on the page—which was created in E15-Creating a Learning Module.
✓ In the **Week 1 Learning Module**, **hover** over the **Build Content** tab and click **Course Link**

![Course Link](image1.png)

✓ The **Create Course Link** page appears. **Click** the **Browse** button to choose the item. A popup appears to select the item that exist in the course

![Browse](image2.png)

✓ Optionally, the **Name** field can be edited to display a different name than the linked item. In addition, the **Location** field displays the link path to the item. Optionally, a description of the link can be provided in the **Description** field

1. **Course Link Information**

   - **Choose Item**
   - **Item Name**
   - **Name**
   - **Location**

![Course Link Information](image3.png)
In section 2, Options, the ability for students to see the link can be disabled, as well as the statistical tracking of which students view the item and when. Like most content items, the date the link first appears and disappears can be enabled and edited.

2. Options

- Permit Users to View this Content
  - Yes
  - No
- Track Number of Views
  - Yes
  - No
- Select Date and Time Restrictions
  - Display After
  - Display Until

Click the Submit button

The Reflection 1 link shows in the module
