

| | Job Interview Experience |
|----------------------|--|
| Objective | The students will learn how to use Facebook Chat by conducting mock interviews online. Each student will be assigned a partner in another class. They will chat two times per week during the lesson unit about jobs. |
| Learning Environment | The students will work individually at a personal or lab computer. They will use Facebook Chat through Facebook on the internet. |
| Types of Students | The students will be in secondary education and in a career skills class. |
| Standards | N/A |
| Materials | Personal or lab computer with internet access, Facebook Chat, a partner from another class, class textbook, and a list of interview questions. |
| Procedures | <ol style="list-style-type: none"> 1. The students will sign up for a user name on Facebook in order to let them utilize Facebook Chat. Also, assign the students a partner from another class. 2. Go through the Facebook website and instruct the students on how to use Facebook Chat. 3. After the students have learned how to use the program, give them thirty minutes to chat with their partners. Each partner will have a list of ten questions to ask each other. They must each record their partner's answers and evaluate them based upon the criteria in their career skills textbook. 4. After the students have finished their chat and the allotted time is complete, they will evaluate and grade their partner based upon the answers they gave. |
| Application | After learning how to use Facebook Chat, the students will use the program to chat with their mock interview partners. |
| Evaluation | <p>The students will evaluate and grade their partner based on their answers to the questions. Each of the partners' recordings of questions and answers will be graded by the teachers of the classes.</p> <p>List of ten questions: 50 points, 5 points per question Answers to questions: 20 points, 2 points per question</p> |
