Picture Collage Project

Learners	7-9 grade English students
Objectives	-Students should be able to put together a creative and well-organized collage of things and people who are important to them using the picture editing software Picasa. -Purpose is to help students become familiar with new technology and to introduce themselves to some of their classmates.
Materials	-Computer with internet access -Camera (optional) -Scanner (optional) -Picasa photo editing software
Procedures	-Ask students to create collages using pictures, symbols and words from websites -Have them illustrate things and people who are important to them, things they like to do, etc -They can also upload personal photos they already have, or take pictures in class to upload -Have the students edit their photos using Picasa and put them into collage form
Evaluation	-They will discuss their collages in small groups -Students will be evaluated on creativity and presentation
