

Elementary Mathematics Tutoring Lesson Plan

Objective	Students who are struggling with homework or material in class will be able to seek help from a tutor through Skype.
Learning Environment	Students must have access to a computer with a webcam and the Internet.
Materials	<ul style="list-style-type: none">• Homework or questions• Paper/pencil• Computer with a webcam• Skype Account
Procedure	<ol style="list-style-type: none">1. Any student seeking help in the math class will talk with the teacher to sign up for a tutor.2. The teacher will help the students arrange a date and time for the session to take place.3. The student will be assigned a tutor and notified of the date and time.4. When the time comes, parents can help the student log into a Skype account.5. The tutor's account name is written on a piece of paper for the student to search. Once the student searches the name and the tutor accepts the session is ready to begin.6. The tutor will call the student and the tutoring session will take place over Skype.7. All of the questions can be answered and the student will get the help that they were seeking in a much more convenient way.

Assessment	The tutor will notify the teacher at the conclusion of the session to discuss what was reviewed and if they need to set up another session.
