

	GoogleDocs STEM Post Secondary Lesson Plan: Statistics Review
Overview	At the end of the semester, students will compile a review of the chapters and include information needed to study for the exam using GoogleDocs.
Objective	Each student will be assigned a chapter to summarize. The students will then create a network and share their reviews with each other. They will be graded for correctness and thoroughness as described by the rubric.
Learning Environment	Students will work on this project on their own time and outside of class.
Description of Students	Undergraduate students studying Statistics and enrolled in Introduction to Statistics course.
Standards	This project will satisfy Indiana's Academic Standard 1a and b for Math
Materials	Access to research materials, including textbook and internet. Internet access for Voo2Do
Procedure	<ol style="list-style-type: none"> 1. Instructor lectures about the project 2. Students each write a review for the assigned chapter 3. They will share the documents with each other through GoogleDocs in order to have a complete set of reviews for the course. 4. The instructor will be able to see the reviews and will grade the students' work by accessing it in GoogleDocs.
Evaluation	Students' final chapter reviews will be graded based on the instructor's desired level of thoroughness, as based on a rubric.
