**Objective:** Given instructions on how to create a blogsite using Movable Type. The student should be able to make their own blog site and add to and edit the website on a weekly basis. The student must also go to other students in the class websites and respond to their given blog topic or conversation.

**Learning Environment:** During class in a computer lab or at home

**Students:** 18-22 year olds, college students

**Materials:** Computer

**Procedure:** In class, the teacher will instruct the student on how to make a blogsite using Movable Type. The students will then create and customize their own page. Each week the teacher will give the students a blog prompt, and the students will have to write a blog on their site stating their views and opinions on the given topic. In addition, each student will be required to respond to two other students blogs in their class.

**Evaluation:** The teacher will grade the students with three criteria: participation, content (grammar, spelling ect.), and the correct use of the Movable Type tools on the blogsite.
