# Balancing Budgets

<table>
<thead>
<tr>
<th>Overview</th>
<th>The business will work in two different groups and develop a Zoho Wiki page on the two different policies implanted by the government.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Objective</td>
<td>To inform a business the concept of balanced federal budget and different types of approaches.</td>
</tr>
</tbody>
</table>
| Standards | Better develop an understanding in domestic policies from the presidencies. Understand:  
Implementation of a public policy on a business |
| Materials |  
- Computers for all business owners with internet access  
- Books suggested articles  
- Paper for notes  
- Over head Projection  
- White board |
| Procedures |  
1. Explain the pros and cons of a “budget deficit and a balanced budget.” Inform the business and bring them up to date by saying the 1990s saw movements interested in an amendment to constitution for a balanced budget. President Clinton signed the “Balanced Budget Act of 1997”  
2. Assign the business to divide into two groups to interact with one another to develop research to better improve their own balance budget for the company. One group will make a Zoho Wiki page in support of a balanced budget amendment and the other groups will do the same but be in support of a “balanced budget act.”  
3. In the Zoho Wiki page each group needs to answer these specific questions which were adapted from the website:  
   - How much work does it take to add or take away an amendment to the Constitution?  
   - What laws do you have to obey by?  
   - Do you think this benefits your company or not?  
   - Reasons why you support or why not.  
4. The need to go around to other parts of the business and see what others feel about the same thing or take a survey.  
5. When both sides are completed they will give the whole business their presentation on Zoho Wiki and everyone in the company will vote on their own personal opinion. |
| Evaluation | You can evaluate the business on their performance before this presentation and after. Help the company notice the changes that would help better their business. |
