

## **Lesson Plan 2: Elementary Education- Family Tree (Created by Shana Musall)**

Grade Level: 2/3

Objectives: After completing this lesson the students will be:

- More familiar with their family ancestry
- More familiar using a camera
- Able to upload the photos onto BubbleShare and make a album of their family tree

Overview: This lesson will help the students grow closer to their family and learn more about their background. They will take a picture of each family member then make a family tree. They will need to upload the photos of their family members on BubbleShare. They will also need to record an audio of each family member saying their name and how they are related to that student.

Materials:

- You will need a camera
- Be in contact with family members
- A computer and be able to upload the images on BubbleShare

Procedures:

1. Each student will receive a camera.
2. The student will take a picture of each of their family members.
3. The family member will also be required to record an audio saying how they are related to that student.
4. The student will upload the images and audio of their family members onto BubbleShare.

Grading: The students will be graded on if the images are uploaded correctly and if there is audio incorporated with the images. They will be graded using the standard grading system which is A-F.
