

Lesson Plan 4: Elementary Education- Color Lesson (Created by Shana Musall)

Grade Level: 1

Objectives: After completing this lesson the students will:

- Have a brief overview of their colors and know them well
- Be able to take photos of the different items
- Be more familiar with uploading photos onto BubbleShare

Overview: This lesson is basic and will provide the young students with an overview of their colors. They will be able to take pictures of different items that are of different colors. Once they take the pictures they will be able to upload the images and label the color each item represents.

Materials:

- You will need a camera
- You will need different colored items
- You will need a computer to upload the images onto BubbleShare

Procedures:

1. Each student will receive a camera.
2. The student will be required to take a picture of an item of each color.
3. Once they have captured the images, the teacher or aid will help each student upload their photos onto BubbleShare. The student will have to identify which color the image represents.

Grading: The students will be graded on if they have the correct images with the corresponding colors. They will also be graded on if the images were uploaded properly.
