

Adobe Photoshop Online

General Goals: To learn how to properly use all the options and features provided in photoshop online.

Specific Objectives: To properly use Adobe Photoshop Online to insert and edit items into a picture.

Required Materials: Digital Camera, Photoshop Online, Computer capable of running photoshop online

Step-By-Step Procedure:

1. Take a picture of a scenic background
2. Take a second picture of yourself or something you'd like to insert into the first picture
3. Upload both pictures onto your computer
4. Open both pictures in Adobe Photoshop Online
5. Open the scenic background first as the background of your project
6. Upload the second picture of yourself
7. Use to lasso tool to outline yourself
8. Delete the extra room in the picture so only you are in the scenic background
9. Drag yourself to where ever you would like to be placed in the background
10. Save the picture and submit it online to your teacher.
11. Write a short summary as to how you feel like using this tool would be helpful when creating projects.
