### Life Cycles of Animals

An Elementary School Lesson Plan

<table>
<thead>
<tr>
<th>Overview</th>
<th>Students will examine life cycle of an animal and learn that all living things are born, grow and change.</th>
</tr>
</thead>
</table>
| Materials | Internet  
computer  
Springnote group account |
| Procedure | 1. Students will do individual research on one particular cycle of their given animal.  
2. Students will then form groups.  
3. Students will record all of the information that they research on the Springnote group page.  
4. Students will then review their information as well as their group mates and put life cycles into the correct order. |
| Evaluation | Students will be graded on ability to work in a cohesive group as well as the ability to put life cycle in correct order. |
