Springnote gives you the option to make a group or personal notebook.

**Group:**
- The group notebook allows every member to edit and access the page.
- They are ideal for group projects, scheduling, or posting information for easy access and collaboration.
- Privacy settings allow the group to only allow certain people to access the page, thereby there is no need to worry about security issues.

**Personal:**
- The personal notebook is ideal for keeping personal records, notes, schedules, or to-do lists.
- You can give people access to read or edit your personal page, or keep it private.
- Students could type up an assignment and allow a teacher access to read and edit their work.

**Individual Features**

- **My Dashboard** organizes all of your group and personal notebooks into one place and lists the recent activity to the page. It also puts other peoples pages in one spot that you interested in.
- **Watchlist** puts all of the pages, created by others, onto your dashboard for easy access.
- **Share** feature allows you to let others access your page with one click of a button.
- **Insert** button allows you to add images, files, movies, maps, equations, and tables to your notebooks.
- **Plug-ins** allows you to create a calendar, insert shortcuts, view the notebook as a slideshow, create a list of subpages, and create a table of contents. You can also insert a “star rating” for quick grading feedback for students.

**Springnote in the Classroom**

Teachers can incorporate the use of Springnote in the classroom in all ranges of subject areas in various ways. Springnote is a great way to teach students how to collaborate together in a group environment by allowing them to interact together in a group notebook. Also, Springnote can help a student edit their own work as easily as they could in a work processing document. Students will also learn to take notes much more efficiently through using this application.
