**Frog Lesson Plan**

**Grades 3-6**

<table>
<thead>
<tr>
<th>Objective</th>
<th>The objective of this lesson plan is to learn about different species of frogs using the internet</th>
</tr>
</thead>
</table>
| Materials | • Worksheet to fill out about specific frog species  
• Access to a computer lab and internet |
| Procedure | 1. Divide the class into groups  
2. Give each group a frog species (e.g. Red eyed Tree frog, Poison Dart frog)  
3. Give each person a worksheet to fill out about their specific frog  
4. Have members of each group take turns using the computer to look up information about their frog  
5. Ask the class to come back together after they have finished their worksheet  
6. Using Ustream, show the students a broadcasting of some of the frogs they were researching  
7. Have the groups present the information about their frog |
| Evaluation | • Participation in group (5 points)  
• Presentation (20 points) |
