

THIS IS AN EXAMPLE OF A LESSON PLAN USING JUSTIN.TV THAT COULD BE USED TO TEACH A 6TH GRADE CLASS

MATH: USING INTERNATIONAL CLASSROOM DISCUSSION

Overview	In this lesson, I plan on showing how class is conducted in other countries by sitting in on another class that is teaching the subject that we are on.
Objective	Students will : <ul style="list-style-type: none"> • See how class is conducted in another country • They will also learn the math topic that we are currently on
Learning environment	We will be in a computer lab.
ISTE Standards	<ol style="list-style-type: none"> 1. Facilitate and Inspire Student Learning and Creativity 2. Design and Develop Digital –Age Learning Experiences and Assessments 5. Engage in Professional Growth and Leadership
Materials	<ul style="list-style-type: none"> • Computer with an internet connection • Math book • Writing Utensil • Paper
Procedure	We will go to the computer lab. Each student will log onto Justin.tv using the school’s login. They then will go to the profile of our international partner. They will then watch the class on the other end and learn from the other teacher. If they have any questions about the material, they can ask me for some help.
Application	<ul style="list-style-type: none"> • Students will be able to have an international experience without actually going there. • They will also learn the subject of math that we are currently working on so there will be no lost time in doing this
Evaluation	Students will write a short essay comparing the international classroom experience to their previous classroom experience. They will also have 15 problems to do on the assignment.
