<tbody>
<tr>
<td>Overview</td>
<td>Students will be asked to brainstorm the project using mindmeister mind maps. This project is for students to brainstorm about creating a new wiki webpage from an already existing website.</td>
</tr>
</tbody>
</table>
| Objective     | 1. Researching the existing website  
2. Applying the research to a formatted webpage  
3. Designing the webpage  
4. Creating a presentation over the newly created webpage |
| Materials     | • Computer and Internet access  
• Mindmeister account |
| Procedure     | 1. Set up individual mindmeister account  
2. Review the Help section of mindmeister to see how it is used  
3. Become familiar with all the different tabs within mindmeister  
4. Create a new mind map, with the title of the project  
5. Have students create different tabs that need to be done to complete the project (i.e.: design, research, project manager, etc)  
6. Have students flesh out ideas that need to be accomplished in each area of the tabs |
| Evaluation    | Students will be evaluated on how well they created their mind maps and how much information they incorporated into their mind maps. |
