

Undergraduate	Brainstorming with Research Data
Overview	Students will be asked to create a mind map on bubbl.us as a form of organization for their research information.
Objective	<ol style="list-style-type: none"> <li>1. Using bubbl.us free online accounts, the students can save their mind maps online so that they can continuously add onto what information they have discovered.</li> <li>2. Using bubbl.us, the students can create a mind map to organize the data that was observed and categorize their information into individual sections.</li> <li>3. Using the information that the students typed out on their bubbl.us mind maps, it will be easier for the students to write out their findings in a formal report.</li> </ol>
Material	<ul style="list-style-type: none"> <li>• Computer and Internet access</li> <li>• A free bubbl.us account</li> </ul>
Procedure	<ol style="list-style-type: none"> <li>1. Instruct the students to log onto the bubbl.us website</li> <li>2. Tell the students to create a free online bubbl.us account.</li> <li>3. Walk the students through how bubbl.us mind maps work.</li> <li>4. Encourage the students to continuously add their data to the online mind map as they conduct their research.</li> <li>5. Allow the students time to conduct their research and collect data.</li> <li>6. At the end of the research period, instruct the students to print out their mind map.</li> <li>7. Have the students turn in their mind map attached to their finished final lab report.</li> </ol>
