

Prezi Lesson Plan

Topic:	Story sequencing and memorization
Target Audience:	1st and 2nd grade
Standards:	Standard 1: Facilitate and Inspire Student Learning and Creativity, and Standard 2: Design and Develop Digital Age Learning Experience
Objectives:	After choosing one of the class' "Five Finger Stories," students will be able to create a Prezi presentation incorporating all 5 steps of their chosen story.
Material/ Time Required:	Multiple computers with the Prezi application (possibly a computer lab)
Scope and Sequence	<p>-First, as a whole class, create a few different "Five Finger Stories." These stories must have 5 distinct parts, one part for each finger on your hand. When the class recites the first part of the story, everyone holds on to their thumb. When the second part is said, everyone switches to their index finger, and so on. Practice having different students recite one of the stories for the class, making sure they grab the corresponding finger to parts 1, 2, 3, 4, and 5. This will help them with sequencing parts of stories and memorization. Examples of possible "Five Finger Stories" could be the 5 steps in making a snowman, or a day at the amusement park.</p> <p>-Once everyone feels comfortable with the memorization process, have the students go to Prezi on a computer. They will choose one of the "Five Finger Stories" created by the class, and will place it into a Prezi presentation. Their Prezi's should have 5 distinct parts, just like their 5 fingers!</p>
Supplementary Materials:	There must be enough computers for each student to create a story.
Evaluation:	When evaluating their Prezi presentations, check to see if the students used one of the stories from class. Pictures and text should be incorporated. Also, make sure they were able to keep a condensed story in 5 parts!
