

**Purdue University**

**How does the technology work?**

SlideRocket let's you create, manage, share, collaborate on, measure, and deliver world class presentations using a Flash enabled browser or AIR (Adobe Integrated Runtime) client on the desktop. SlideRocket reinvents presentations by providing a professional set of authoring tools, team based collaboration, an integrated marketplace of content and services, intelligent asset management and presentation analytics all integrated into one complete suite to support the entire life cycle of your presentation and related materials.

**Located in the Stewart Center**

# MAKE GREAT PRESENTATIONS.

## How is the technology used in other countries?

SlideRocket is used around the world in over 166 countries by users who speak more than 90 languages. SlideRocket is accessible to anyone with an internet connection and a browser that supports Flash making .This is highly desirable to users in sales & marketing, education, design / media, events, pretty much anyone who needs to communicate their ideas.

## How is the technology related to other applications?

SlideRocket is related to its desktop counterparts PowerPoint (Microsoft) and Keynote (Apple) but goes far beyond these legacy solutions by offering full support for the entire lifecycle of a presentation, from creation, through management and iteration, sharing and collaboration, publishing and measurement to ensure your message reaches the right audience at the right time.

## What is the purpose of the technology?

1. To help you make great presentations that let you convincingly communicate your ideas to engage and persuade your intended audience
2. To provide a complete and integrated alternative to desktop counterparts
