  - Respiratory protection:
    - Not necessary if room is well-ventilated.
    - Use suitable respiratory protective device in case of insufficient ventilation.

- Protection of hands:
  - Protective gloves
    - The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.
    - Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.
    - Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation.
  - Material of gloves
    - Rubber gloves
      - The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.
    - Penetration time of glove material
      - The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

- Additional ecological information:
  - General notes:
    Water hazard class 1 (German Regulation) (Self-assessment): slightly hazardous for water
    Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage
    system.
    Must not reach sewage water or drainage ditch undiluted or neutralized.
    Rinse off of bigger amounts into drains or the aquatic environment may lead to increased pH-values. A
    high pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably
    reduced, so that after the use of the product the aqueous waste, emptied into drains, is only low water-
    dangerous.
  - 12.5 Results of PBT and vPvB assessment
    - PBT: Not applicable.
    - vPvB: Not applicable.
  - 12.6 Other adverse effects No further relevant information available.

13 Disposal considerations

- 13.1 Waste treatment methods
  - Recommendation
    Small amounts may be diluted with plenty of water and washed away. Dispose of bigger amounts in
    accordance with Local Authority requirements.
