SAFETY DATA SHEET

Product: Spherical APA Ti-6Al-4V Powder (Fine)

SECTION 1  IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND COMPANY UNDERTAKING

1.1 Identification of the substance or preparation
Trade / material name:  Spherical APA Ti-6Al-4V powder (Fine)
Chemical name:  Titanium 6-Aluminum 4-Vanadium Alloy Powder
(size: 0-20 µm, 0-25 µm, 10-45 µm, 15-45 µm, 25-45 µm, 0-45 µm)
Synonyms:  Ti-6Al-4V Grade 5 Powder
           Ti-6Al-4V Grade 23 Powder
           Ti-6Al-4V ELI Powder (Extra Low Interstitials)

1.2 Use of the substance/preparation
Powder metallurgy parts manufacturing including additive manufacturing, metal injection molding, laser sintering, plasma spraying, cold spraying or others.

1.3 Company/undertaking identification
AP&C Advanced Powders and Coatings Inc.
3765 La Vérendrye, suite 110,
Boisbriand, Quebec, J7H 1R8
CANADA
Phone No.: +1 450.434.1004
Resp.: Frédéric Marion fmarion@advancedpowders.com

1.4 Emergency Telephone
24-Hour Transportation Emergency Phone: CANUTEC +1 613.996.6666

SECTION 2  HAZARDS IDENTIFICATION

2.1 Classification of the substance or mixture

This substance is considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200).

2.1.1. CLP

2.1.2. CHIP (Chemical Hazard Information for Packaging and Supply)
Risk phrases:  Flammable solids – Category 1
              Combustible dusts
Physical/Chemical Hazards:  Dust clouds may form explosive mixtures with air. Handling and/or processing of this material may generate a dust which can cause mechanical irritation of the eyes, skin, nose and throat.
Safety phrases:  S16 – Keep away from sources of ignition - No smoking.
                S22 – Do not breathe dust.
SAFETY DATA SHEET

Product: Spherical APA Ti-6Al-4V Powder (Fine)

S23 – Do not breathe fumes.
S33 – Take precautionary measures against static discharges.
S36/37 – Wear suitable protective clothing and gloves.
S38 – In case of insufficient ventilation, wear suitable respiratory equipment.
S43 – In case of fire, use sand.
S51 – Use only in well-ventilated areas.
S60 – This material and its container must be disposed of as hazardous waste.

2.2 Label elements

Hazard pictograms:

![Flammable Hazard Pictogram]

Signal word: Danger

Hazard statements: H228 – Flammable solid.
May form combustible dust concentrations in air.

Precautionary statements

Prevention:
P210 – Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P241 – Use explosion-proof electrical equipment.
P243 – Take precautionary measures against static discharge.
P280 – Wear protective gloves, protective clothing and eye protection.
P370 + 378 – In case of fire: Use table salt, dry sand or Class D Fire Extinguisher to contain fire.

Response: Get medical attention if you feel unwell. If exposed or concerned: get medical attention.

Storage: Not applicable

Disposal: Not applicable

Hazardous ingredients: None

Supplemental label elements: None

Special packaging requirements:

Containers to be fitted with child-resistant fastenings: Not applicable

Tactile warning of danger: Not applicable

2.3 Other hazards

Other hazards which do not result in classification: Dust clouds may form explosive mixture with air. Handling and/or processing of this material may generate a dust which can cause mechanical irritation of the eyes, skin, nose and throat.
SECTION 3 COMPOSITION/INFORMATION ON INGREDIENTS

Substance/Mixture: Mixture

Type

[1] Substance classified with a health or environmental hazard
[2] Substance with a workplace exposure limit

SECTION 4 FIRST AID MEASURES

4.1 Description of first aid measures

Eye contact: Immediately flush eyes gently and thoroughly, including under the eyelids, with clean running water for 20 minutes.

Skin contact: Wash thoroughly with soap and water. Remove and properly dispose or launder contaminated clothing before wearing it again. Clean material from shoes and equipment. Seek medical attention.

Inhalation: Remove victim to fresh air. Restore and/or support breathing as needed. Seek medical attention.

Ingestion: Call poison control centre. Never give anything by mouth to someone who is unconscious or convulsing. A professional decision about whether or not to induce vomiting is required. Seek medical attention.

4.2 Most important symptoms and effects

Eye contact: Moderate irritating to eyes.

Skin contact: Prolonged or repeated exposure may be irritating.

Inhalation: Prolonged or repeated exposure to large amounts may cause damage to lungs.

Ingestion: Prolonged or repeated exposure may be irritating to mouth, throat and oesophagus.

4.3 Indication of any immediate medical attention and special treatment needed

Notes to physician: Call poison treatment specialist immediately if large quantities have been ingested or inhaled.

Specific treatments: None
SECTION 5  FIRE-FIGHTING MEASURES

5.1 Suitable extinguishing media: Use approved Class D extinguisher or smother with dry sand, dry clay, dry limestone or salt.

5.2 Not suitable as extinguishing media: Do not use water, dry chemical, CO₂, or halon.

5.3 Special protective equipment for fire-fighters: Wear appropriate protective equipment and self-contained breathing apparatus (SCBA).

SECTION 6  ACCIDENTAL RELEASE MEASURES

6.1 Personal precautions: Immediately contact emergency personnel. Remove all sources of ignition. Keep unnecessary personnel away. Use suitable protective equipment. Do not touch or walk through spilt material.

6.2 Environmental precautions: Keep spilt material away from drains and runoff, ground-water and soil.

6.3 Methods for containment and clean-up: Do not use compressed air to clean spills. Use non-sparking tools to clean up. Do not push powder long distances across the floor. Keep in small piles away from each other. Place collected material into non-sparking or anti-static containers, containing large quantities of sand, or other appropriate heat dissipation materials. The use of plastic bags is not recommended, due to potential for static electricity build-up (inside plastic bags).

6.4 Reference to other sections: See section 1 for contact information. See section 8 for information on appropriate personal protective equipment. See section 13 for waste treatment information.

SECTION 7  HANDLING AND STORAGE

7.1 Handling: Keep powder away from open flames and other sources of ignition. No smoking in area. Prevent electrostatic build-up. Use non-sparking metal tools and equipment. When transferring powder between two containers, bonding and grounding the containers or equipment is highly recommended. Dust clouds should be minimized when handling the powder. Consider using an inert gas cover when powder dust clouds may be present. Electrical installation should meet code for handling hazardous material (combustible dust). Maintain a supply of “coarse” (rock-type) salt and/or “Class D” (for metal fires) fire extinguisher located near processing and storage areas. Keep work areas clean and free of waste and minimise dust accumulation on surfaces (walls, floor, equipment). Standard industrial vacuum systems should not be used for cleaning.

7.2 Storage: Keep container in a cool, well-ventilated area. Keep container tightly closed and sealed until ready for use. Avoid all possible sources of ignition (spark or flame). Comply with local fire prevention and building codes for the storage of these materials. Storage area should be separated from handling area. Keep away from incompatible materials.

7.3 Specific end use(s) recommendations and industrial sector specific solutions: Not available
8.1 Control parameters

Exposure limit values:

Vanadium

OSHA: Occupational Safety and Health Administration
PEL: Permissible Exposure Limit
ACGIH: American Conference of Governmental Industrial Hygienists
TLV: Threshold Limit Value
TRGS 900: Technische Regel Gefahrstoffe 900- Germany
AGW: Workplace exposure limit
TWA: Time-weighted average
NE: Not Established

8.2 Exposure controls

8.2.1. Occupational exposure controls: Install and operate general and/or local exhaust ventilation systems of sufficient power to maintain airborne concentration below the defined or recommended limit.

8.2.2. Respiratory protection: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard. Respirator selection must be based on known or anticipated exposure levels, the hazards of the material, and the safe working limits of the selected respirator.

8.2.3. Hand protection: Non-static gloves when skin abrasion is possible. For hygienic reasons, rubber gloves should not be worn more than 2 hours.

8.2.4. Eye protection: Safety glasses with side shields or goggles when potential exposure exists.

8.2.5. Skin protection: Wear fire-resistant clothing when handling materials.
SECTION 9 PHYSICAL AND CHEMICAL PROPERTIES

General Information:

Appearance: Solid metallic powder, grey
Odour: None
Melting point: 1605-1660 °C
Explosive properties: Dust clouds may form explosive mixtures with air.
Relative density: 4.43 (H_2O=1)
Water solubility: Insoluble.
Flammability: Flammable solid
Oxidising properties: Not expected.

Typical data for 15-45 microns powder (D10 - 21 μm / D50 - 32 μm / D90 - 49 μm):

Minimum ignition energy (MIE): 4-5 mJ – without inductance (< 25 μH)
3-4 mJ – with inductance (1 mH)

Explosion severity (20 litre sphere):
- $P_{max}$: 6.1 bar @ 4000 g/m³
- $(dP/dt)_{max}$: 200 bar/s @ 6000 g/m³
- $K_{st}$: 60 bar m/s
- $St$ class: 1

Limiting oxygen concentration (LOC): 7% O₂ (v/v)

Minimum explosive concentration (MEC): 50 g/m³

Minimum (dust cloud) ignition temperature (MIT): 473 °C

Layer (5 mm) ignition temperature (LIT): 325 °C

*Previous data were obtained from a representative sample but individual lot result may vary. Particle size distribution will strongly influence powder reactivity.

SECTION 10 STABILITY AND REACTIVITY

10.1 Reactivity: No specific test data related to reactivity available for this product.

10.2 Chemical stability: This product is stable under normal storage conditions.

10.3 Possibility of hazardous reactions: Under normal conditions of storage and use, hazardous reactions will not occur.

10.4 Conditions to avoid: Static electricity, heat or ignition source, formation of dust cloud.

10.5 Incompatible materials: Combustible materials, acid, oxidizing agents, halogenated hydrocarbons.

10.6 Hazardous decomposition products: None

SECTION 11 TOXICOLOGICAL INFORMATION

No scientific evidence was found of a health hazard from the inhalation of titanium powder in concentration of air that does not exceed 10 mg/m³ total dust containing less than 1% quartz. The toxicity of titanium has been found to be relatively inert. Skin contact with titanium powders may cause physical abrasion. Eye contact has shown particulate irritation. This product is not considered carcinogenic, mutagenic, or teratogenic.
SAFETY DATA SHEET

Product: Spherical APA Ti-6Al-4V Powder (Fine)

SECTION 12 ECOLOGICAL INFORMATION

No known significant effects or critical hazards for this product. The individual elements might have some degree of ecotoxicity not reported here.

12.1. Toxicity: Not available
12.2. Persistence and degradability: Not available
12.3. Bioaccumulative potential: Not available
12.4. Mobility in soil: Not available
12.5. Results of PBT and vPvB assessment: Not applicable
12.6. Other adverse effects: No known significant effects or critical hazards.

SECTION 13 DISPOSAL CONSIDERATIONS

13.1 Waste treatment methods

The generation of waste should be avoided or minimised whenever possible. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Disposal of this product, and any by-product should at all times comply with the requirements of environmental protection and waste disposal legislation and any national, regional and local authority requirements. Contaminated packaging materials, cleaning tissues, disposable gloves, and other contaminated materials should be disposed off in the same manner as the product itself.

SECTION 14 TRANSPORT INFORMATION

14.1 UN number: UN 3089
14.2 UN proper shipping name: Metal powders, flammable, n.o.s.
14.3 Transport hazard class(es): 4.1
14.4 Packing group: II
14.5 Environmental hazards: No
SAFETY DATA SHEET

Product: Spherical APA Ti-6Al-4V Powder (Fine)

14.6 Special precautions for user: Not available

14.7 Transport in bulk according to Annex II of MARPOL 73/78 and IBS Code: Not available

SECTION 15 REGULATORY INFORMATION

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture
EU Regulation (EC) No. 1907/2006 (REACH)
Annex XIV - List of substances subject to authorisation
Substances of very high concern

None of the components are listed.

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles:

Additional information

Fire hazard

Other EU regulations
Europe inventory: Not listed
Black List Chemicals: Not listed
Priority List Chemicals: Not listed
Integrated pollution prevention and control list (IPPC) – Air: Not listed
Integrated pollution prevention and control list (IPPC) – Water: Not listed

International regulations
Chemical Weapons Convention List Schedule I Chemicals: Not listed
Chemical Weapons Convention List Schedule II Chemicals: Not listed
Chemical Weapons Convention List Schedule III Chemicals: Not listed

German regulations
Storage code: 4.1B
Hazard class for water: WGK 2
Waste catalogue classification: 12-01-04 – hazardous waste – HP3

15.2 Chemical Safety Assessment:
This product contains substances for which Chemical Safety Assessments are still required.

SECTION 16 OTHER INFORMATION

16.1 Abbreviations and acronyms

[DSD/DPD] classification:
F – Highly flammable

[CLP/GHS] classification:
Flam. Sol. 1 – Flammable solids category 1
Water-react. 2 – Substance or mixture which in contact with water emits flammable gas category 2

Risk phrases:
R11 – Highly flammable
R15 – Contact with water liberates extremely flammable gases
R17 – Spontaneously flammable in air
SAFETY DATA SHEET

Product: Spherical APA Ti-6Al-4V Powder (Fine)

Safety phrases:
S16 – Keep away from sources of ignition - No smoking.
S22 – Do not breathe dust.
S23 – Do not breathe fumes.
S33 – Take precautionary measures against static discharges.
S36/37 – Wear suitable protective clothing and gloves.
S38 – In case of insufficient ventilation, wear suitable respiratory equipment.
S43 – In case of fire, use sand.
S51 – Use only in well-ventilated areas.
S60 – This material and its container must be disposed of as hazardous waste.

H statements:
H228 – Flammable solid
H261 – In contact with water releases flammable gas

Precautionary statements:
P210 – Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P241 – Use explosion-proof electrical equipment.
P243 – Take precautionary measures against static discharge
P280 – Wear protective gloves, protective clothing and eye protection.
P370 + 378 – In case of fire: Use table salt, dry sand or Class D Fire Extinguisher to contain fire.

16.2 References and sources of primary data
Not available
