Purpose">Purpose

What are the uses of Evernote?">What are the uses of Evernote?

Evernote is an innovative, creative, and useful Web 2.0 application. Evernote was created in 2004 as a note taking application that can be used online and offline. If you are looking for a way to capture all of those important images you see everyday so you can recall them at a later time, Evernote is the way to go. Evernote allows everyone to save pictures, thoughts, lesson plans, nearly anything from computers, cell phones, iPods, and much more. Evernote allows you to save these notes, organize them, and search through them to find them easily.

What does Evernote do?">What does Evernote do?

Evernote is a note taking website. You can simply go to the website and start a new note, and begin typing. Once you are finished with your note, you simply just add it to your account. Evernote also has an extension with Firefox. Using Firefox you can just highlight text, pictures, or videos and simply click a button and it will be added. Evernote allows you to have a specific e-mail address that you can send notes to and they will automatically be added to your account, and you can access it later. Snapshots or pictures you add to your account can also be translated to text using an advanced text recognition device.

Who uses Evernote? ">Who uses Evernote?

You can search through everything you have saved to your Evernote account very easily by a simple search using a key word, or a filter. Evernote even allows you to save every search, so it is easy to go back and search for something you have searched for in the past. It even allows you to save complicated searches that contain complex works, tags, or other filters. Evernote is able to search text within images. It is able to scan any image and analyze it for any text contained in it, this includes snapshots, web pictures, screenshots, and pictures from cellular phones and other mobile devices.

I.1 History">I.1 History

">

Development">Development

Evernote is a web 2.0 application that allows you to take pictures of nearly anything you want to remember or recall, store and organize them in Evernote, and access them easily at anytime. Evernote is a program that can be used by anyone, from anywhere.

Evernote allows you to easily capture information using numerous devices; computer, phone, iPod, etc. Evernote makes the information that has been captured accessible at any time and from anywhere!

Evernote will also save the site that a person got the information from. Students can use this for references.

Don't know where to find the information that you need? Below is some information on each of the links telling you what information each one holds. Just read through each section and you can learn all you need to know about each of the pages and what will be beneficial to you.

How Evernote Works">How Evernote Works

Evernote is like an "external brain." In other words, if there is something that you want to remember, you can simply highlight that piece of information and paste it in your personal Evernote clipboard for use at a later time.

When you paste some information in the Evernote program on the notebook, Evernote saves that information as long as you would like it to. When you need to find that information there are a couple of ways that you can find what you are looking for. One way is to sort through your notebook, or another way is to type one word that is located in the item that you are looking for in the find box. The word that you type in should become highlighted in the item being searched which helps you to find what you are looking for very quickly. As you can tell, it is very simple, easy and quick to save information needed by a click of a button.

Along with that, a computer is not the only way that Evernote can be accessible. It can also be used from your cell phone, iPod, or other mobile device, that way you can carry your information with you where ever you go instead of having to take your computer with you everywhere you go.

If one is interested in using Evernote, they first need to visit the Evernote website. There they can choose to download one of the many different versions of Evernote. However, they need to make sure that they are downloading the one that will be compatible for their computer or cell phone.

The different versions of Evernote available are as follows according to the Evernote website, <http://www.evernote.com/about/download/> :

For your computer:

Web clipper

Mac OS X

Windows

For your mobile devices:

iPhone or iPod Touch

iPad

Android (below)

Blackberry

Palm Pre or Palm Pixi

Windows Mobile

Ways to Upload Media:

One of the main strengths of this application is that there are many ways to obtain and upload information!

- 1.) On your desktop:
 - Search through all your notes and organize them
 - Upload on MAC or PC
 - Find text within images
- 2.) On the web:
 - Create and share notes
- 3.) On your phone:
 - Take Snap shots
 - Make and read a to-do list
 - Record Audio
 - Make additions to your pages from anywhere

Getting More Out of the Application

">

There are several different ways that Evernote can be used. The following are some of the most common ways that this program can work for any individual.

For office use: At the end of each day, it is typical for desks to be covered in sticky notes, scrap paper notes, and print-outs that need to be preserved. To keep your office space tidy, one could take pictures of the sticky notes, scrap papers, or print-outs and insert these pictures into an Evernote notebook.

For meetings: To keep your colleagues' inboxes less cluttered, you could show meeting attendees your Evernote file for the meeting and let them choose which information you share. Notes could also be taken using Evernote during the meeting. This method is more efficient than taking notes by hand and then transferring to the computer.

As a financial organizer: Instead of saving all your receipts, invoices, and bills in paper form, one can capture these documents and organize them on Evernote. Just as Evernote makes organizing and tracking notes and emails easier, it also makes it simple to organize your financial expenditures.

For projects: A new notebook could be created to store all the information for various projects. Using the tags features, you can easily sort the different tasks and research topics needed for the project. Now, everything you need or want to recall, will be kept in one spot.

For students: With Evernote students can take more efficient notes in class. All they have to do is type the notes into their Evernote file and then the notes will be conveniently and easily accessible to them anytime they want to review them. They can also take a picture of important items up on the screen or board and place those into their Evernote file as well. Students also can use Evernote when studying their textbooks. They can take pictures of important definitions, headings, graphics, charts, or tables that they come across in their reading and can then put them into their Evernote folder, from where they can quickly and easily retrieve them later. This way they won't have to carry their textbook around all the time to study or answer questions in class.

Whether it be for use in an office, meeting, ministry, daycare, or classroom, Evernote allows you to keep all of your information in one location. With Evernote, you can easily print, email, delete, or edit any of your notes.

"Evernote's desktop client makes it easy to organize text, notes, pictures, and clippings from other applications into "notebooks," which basically act similarly to folders or albums in most other applications. As a very welcome touch, notes can be viewed in either a list form (such as Mail, Journler, etc.) or as thumbnails. This can make notes a bit easier to browse through and recognize at a glance, especially if you're organizing a lot of images. A decent set of rich text editing tools are available for text notes (font selection, bold/italic/underline, text justification, etc.), and to-do checkboxes can be created for basic task management. Tasks can be seen online once notebooks are synced, but they cannot be checked off from a browser." From the picture above, you can see at the top left corner in the blue side column, the notebooks (folders) that this individual has created. Clicking on one of them will lead you to all of the information stored in that notebook. From there, you can easily view any notebook you have created (Chartier, 2008)."

Table of Contents

Sponsored Accounts

">

Another feature that makes Evernote easier to use in the classroom is the sponsored accounts option. With the sponsored accounts option, an entire organization of people, whether it's a business, school, or project group, can get the premium version of Evernote. There is a monthly charged involved with it but it is much easier to pay than for individual accounts. The sponsored accounts get administrative access and also the top priority support from the people at Evernote. Another option that may apply is a 50% educational discount for educational institutions that apply.

II. How Evernote Relates to Other Applications

How to Join">How to Join

Click on the link below for the Getting Started Page from Evernote. This page teaches you how to install Evernote, create an account with Evernote, create notes using Evernote, add images to Evernote, save web contents to Evernote, and much more.

[Getting Started With Evernote](#)

Table of Contents##h3. *TableofContents*j">Table of Contents

Comparison to Competitors">Comparison to Competitors

Evernote is compatible with Windows or Mac computers, and cell phones. Each application is shown below in the pictures. Click on the following links to help you become more familiar with using Evernote from one or all three of these applications.

Some say that Evernote is similar to the website Twitter. Twitter is primarily a communication tool while Evernote allows you to save and organize notes and allows you to exceed 140 characters. Evernote also allows you to connect via Twitter to save notes.

Table of Contents##h3. *TableofContents*j">Table of Contents

Unique Uses">Unique Uses

This application is unique in many ways and unlike any other web application it is not linear. In other words, when using this application you are able to add text/information, pictures, videos and links just as you can with any other web application leaving plenty of room for creativity. However with the web 2.0 application Evernote, there are also many other things you can do. Evernote recognizes that we are given all kinds of information on a daily basis, and our brains cannot possibly store all of this information. For that reason, many things are lost and forgot. Therefore, Evernote has allowed us to begin to capture all of these ideas and experiences from our real lives from a digital standpoint, so the memories or ideas will not slip away. This helps us understand the slogan "REMEMBER EVERYTHING" and to specifically understand how awesome it really is!

Evernote is its own unique website for saving notes, research, or anything else you need to save and have quick access too. The relationship between Evernote and other applications is that you can "copy and paste" information from one application onto an Evernote page and have access to it later. For example, if you found a paragraph with alot of information in it, and you didn't want to write everything down with pen and paper, you would simply highlight the text you need and save it to an Evernote page. Then, you can easily access it at a later time.

If you are a forgetful person, Evernote would be ideal for you to use. Evernote allows you to capture and organize things now, so you can find them easily later. You can capture things using a computer (Windows or Mac) or a cell phone, simply highlighting the information, taking pictures, or by finding things on the internet and placing them into your Evernote account. When you add things to your account, it is synchronized across all of your devices, that way it makes it easy for you to access your things whether you are at home, or on the go.

Evernote allows you to search quickly through all of the things you saved in your account to find the information you want to look at. You can do this through a simple search or a filter.

Things you may want to capture:

To-do listNotesReasearchWebpagesBusiness cardsSnapshotsVideos

Everyone needs a more organization in their lives, and where better to start then all those pictures, dates, events, notes, homework, to do lists, and more rattling around in your head. Evernote can provide anyone with an easy and accessible way of organizing thoughts, pictures, memories, and tasks needing to be remembered.

Below are additional links to brief videos regarding other ways Evernote can be used outside of the educational and business world.
RecipesPreparing SermonsWine ListsBooks

Busy working mothers can organize their work schedules along with their kids schedules conveniently on Evernote. People interested in photography can easily store and organize pictures without having to take up storage space on their personal computers or buy expensive extra storage space for their computers. People can save pictures of weekly to do lists so that they can easily stay organized and not forget obligations. These are just a few examples of ways people use Evernote to make their lives a little less hectic and more organized. The uses of Evernote are vast and are sure to provide everyone with more helpful means of organization.

Evernote has a new component by Dail2Do where you can convert your audio recorded notes into searchable and taggable text. This process is as simple as calling the Voice2Note phone number, recording your note, and uploading it to Evernote.

Evernote has recently reached a partnership with IdeaPaint, which will be very cost efficient and unique to your business, classroom, or home. IdeaPaint is a specific and unique type of paint that turns any hard surface into a presentation "white board". Once these ideas are written using IdeaPaint, this is where Evernote creates a unique note taking experience. Once you are done using IdeaPaint, simply snap a photo of the presentation, and upload the image to Evernote. Once your image is uploaded to Evernote, each and every word captured with the IdeaPaint is now searchable and can be shared with teams, students, or colleagues.

Check out the video below of how Evernote and IdeaPaint work together:

Business/Industry

** **

Businesses and industries can also greatly benefit from Evernote. They can take pictures of the many business cards they are given and organize them in Evernote. Later the business or industry can easily access and recall a certain business card. Below is an example of a business card saved into Evernote. Other ways businesses and industries can benefit from Evernote is by taking pictures of job sights, projects, proposals, and many other business related items and organizing them in Evernote.

Businesses can also benefit by using Evernote. They can use it to organize business cards, clientele information, pictures, but most importantly, take notes on all of the above. It's one thing to have an organized list of business cards, it's another to also have a description of how good or bad the service was or if they have been recommended by someone. Also, it is convenient to have clients' information at your fingertips. If you have a scheduling conflict and need to cancel, you can create a link on the client's name to show you his or her email or phone number just by clicking their name so that you can contact them to change the meeting. This is much more convenient and safer than carrying around a pocketbook with client's contact information while traveling. Also, you can upload pictures from seminars or sites to show coworkers at a later date in an organized and relevant fashion.

Table of Contents

IV. Demonstration of Educational Value

Evernote is a very useful Web 2.0 application for individuals in every situation. Evernote allows individuals to capture pictures of almost anything they wish to remember. In a few quick short steps those pictures can be saved into Evernote, organized, and given a brief short description making the picture easily accessible in the future. Secondary students, post secondary students, teachers, professors, businesses, and industries all can greatly benefit from Evernote for a variety of different reason specific for their different environments and situations.

Students in all different educational levels and backgrounds can use Evernote to organize their educational priorities. Evernote can help students keep track of their notes, research, homework, tests, quizzes, and anything else that is school related. It would be great to never have to worry about losing those important assignments. Evernote can take that worry away. It is as simple as students photographing all of their important papers, documents, and projects. After that, all the student has to do is upload the important pictures into Evernote in one quick step and organize his or her pictures. He or she can organize the pictures by projects, classes, or anything for that matter. Evernote has made the organizational hassel of being a student much easier and accessible.

Here are a few examples from the Evernote blog on how teachers and students have used Evernote to help them in school:

[10 Tips for Teachers Using Evernote](#)

[How My Students Started Usinv

Evernote]<http://blog.evernote.com/2011/01/05/how-my-students-started-using-evernote-education-series/>

[10 Evernote Tips For School](#)

[How Evernote Helped Me Through College](#)

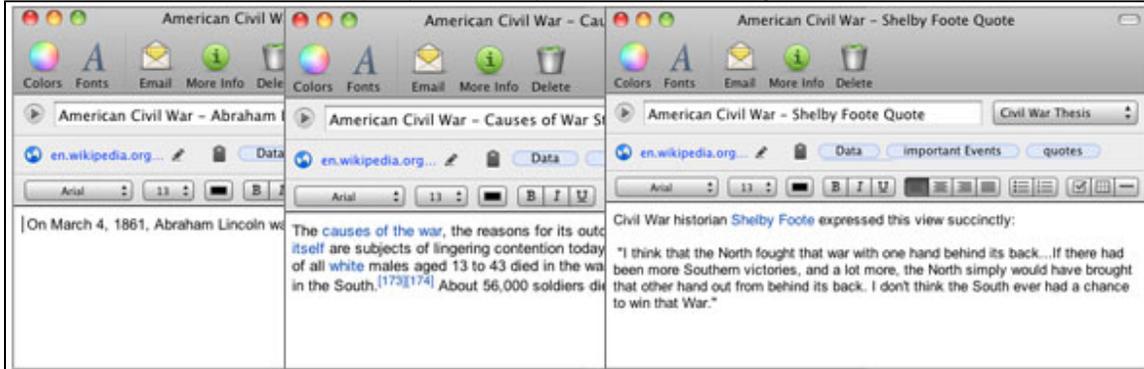

[Evernote

for Students: The Ultimate Research Tool]<http://blog.evernote.com/2011/02/11/evernote-for-students-the-ultimate-research-tool-education-series/>

Evernote makes the stressful life of a student a bit easier by enabling the student to not have to worry about losing important papers, other written assignments, or class notes. It can organize them by class, which also makes it easy for future reference when the student goes to study for an exam over the material. Also, because Evernote is on the Internet, a student can easily access their information when they are on the go from their cell phone or from anywhere on any computer with an Internet connection. Teachers can enjoy the convenience of Evernote as well. Instead of carrying mounds of papers home to be graded over a break or long weekend, the teacher can take pictures of the assignments and upload them into Evernote. Then, while away from school, the teacher can grade the papers at his or her leisure without the worry of misplacing or completely losing any papers.

Evernote is also a fantastic research tool for students. Whether the student is doing a research paper, studying for a quiz or exam, or looking for important quotations and facts, Evernote will make this all much simpler. Rather than the student rummaging through written notes, reading through entire web pages of information, the student can simply take a picture of their written notes, capture the web page, and they now have it all stored and organized in Evernote. This allows the student to search key terms and quotes to make their research and studying more effective and time efficient.

- Here is a screenshot of how one can quickly research key terms and quotes using Evernote:

Why Evernote would make a lesson plan easier and more accessible?

You will not have to create transparencies or powerpoints to present the pictures pertaining to each section. You will already have the pictures saved to your computer, which will make creating the handouts and quizzes much easier.

When it is time for the lesson you will be able to easily access your pictures. It will be easy to save the pictures you find on the internet that pertain to your lesson plan on Evernote. All that is necessary is to copy and paste, drag the pictures in Evernote.

You can easily organize your pictures into the different sections of your lesson plan. You will be introducing an easy and accessible means of organization to your class.

Evernote can make the duties of teaching more organized, easy, and accessible by being able to capture pictures of lessons on a white board, pictures of lessons and activities, pictures of field trips, and much more. Also, elementary teachers typically receive numerous gifts from their students such as drawings, paintings, and crafts. Over the years the gifts received can add up. Evernote allows teachers, moms, anyone to take pictures of all your special gifts, store them, and organize them. Art teachers could also greatly benefit from Evernote. Lugging a tons of art projects home can be a hassle. Evernote allows them to take individual pictures of each art project, save the pictures, organize them by class and projects, and access them at home for easy grading. There are many other situations that can help elementary school teachers in the educational environments.

Teachers in all grade levels can benefit from Evernote. This section focuses on junior high teachers, high school teachers, college professors, and college teacher assistants. They can use Evernote in a variety of different situations. Video clips are often used to portray a lesson in the classroom setting. However, where do those video clips come from? Teachers often just stumbled upon great examples that could be used to convey a lesson or an idea to their class. Evernote allows them to take a picture of the video itself, the title, or the link to the video. After they photograph the video they can save, organize, and give a brief explanation about the video in Evernote. They can then access and remember the educational video at anytime. Teachers can also use Evernote to capture pictures of research, homework assignments, and projects. Saving and organizing assignments to Evernote will allow teachers to access them from home or another environment and easily grade them.

Here is an example of how Evernote was used in a real school:

[Table of Contents](#)

V. How Evernote Is Used Internationally

Evernote can be used anywhere in the world by anyone. No matter where you are from or where you live, Evernote is a simple, useful web 2.0 application. Evernote can be used the same way in other countries. Evernote is a relatively new web 2.0 application, and unfortunately cannot be accessed in other languages at this stage. However, Evernote is a simple web 2.0 application to use. The same steps for using Evernote apply to everyone using this application from anywhere. Evernote can help anyone organize all of those important images rattling around in their mind and access them easily from anywhere at any time.

Despite the fact that Evernote is a relatively new web 2.0 application and there are not yet versions of Evernote available in other languages, Evernote can still greatly benefit those around the world. Evernote allows each individual user to create their own account, save their own images, and organize their images in any means desired by the individual user. This benefit provides Evernote users to save and organize the information in their desired language. Evernote is also accessible to everyone worldwide.

International teachers could use Evernote for the very same purposes. International teachers could use Evernote to organize and access their lesson plans, simulations, classroom activities, and much more. Evernote makes it extremely easy for individuals to save, organize, and access

information. Evernote provides the same perks to international teachers as well. The only difference for international teachers in using Evernote is saving and organizing their desired information in their own language. Allowing international teachers to do this would essentially make Evernote a great web 2.0 application for them to use.

Notes

Evernote could be extremely useful for international students as well. As explained early in another chapter, Evernote provides an easy, organized, and accessible means of note taking. All students, national or international, can greatly benefit from using Evernote. Steps for Note Taking for National and International Students are:

Begin by taking your in class notes on your laptop. Dells and Macs work with best with Evernote. However, every computer can access and use Evernote. Save your in class notes to the software you are using i.e. Microsoft Word, Word Pad, ect. Here comes the easy part! Just simply upload your notes into Evernote. If you are using Firefox the above step is even easier. Simply click on your notes, and drag them into your Evernote folder. When your notes are saved into Evernote, you can continue to organize your notes into the specific classes they correlate to, dates, times, ect. Whatever means of organization you desire is possible.

International Businesses and Industries

International businesses and industries can benefit from the perks of Evernote as well. Many businesses are swamped with tons of business cards. Evernote can provide a simple way to organize all of those important business cards without having to hold onto all of them. All an international business or industry would need to do to organize their important business cards is:

Simply take pictures of each individual important business card. Upload your photos onto your computer. Click and drag all of the pictures into Evernote. Once you are in Evernote with the important pictures of business cards, organize the pictures.

Evernote can be used to save and organize recipes. You will never lose another recipe again because Evernote allows you to organize and access your recipes at any time. Anyone, whether they are international or national, can use Evernote to save and access their recipes.

International individuals can use Evernote to organize and access their images and videos as well. It is made even more accommodating for international individuals because they can save and organize their desired images and videos with their own language.

Evernote can essentially be used to everyone everywhere for any means of saving, organizing, and accessing their desired information.
