

Checklist Macro

The **Checklist Macro** helps to create checklist tables for a subset of pages (children of a given parent-page and/or filtered by a label). For each page, labels can be added/removed, values can be edited, and text segments can be added. It provides an easy way to construct to-do lists, or manage the stages of a project. You could even use it to create a document work-flow.

Create a checklist

```
{checklist:name=pages|parent=Checklist Macro|checklabels=view, no-view,  
going-to-view}
```
