

Google Calendar Macro

The *Google Calendar Macro* allows you to view a simple version of a calendar from an external website.

US and Australian holidays calendar

```
{google-calendar:mode=agenda|title=Australian and US Holidays|controls=all}  
// Australian Holidays calendar (XML link)  
http://www.google.com/calendar/ical/australian@holiday.calendar.google.com  
/public/basic  
// USA Holiday calendar (ICAL link)  
http://www.google.com/calendar/ical/usa@holiday.calendar.google.com/public  
/basic.ics  
{google-calendar}
```

Unknown macro: {google-calendar}

```
// Australian Holidays calendar (XML link) http://www.google.com/calendar/ical/australian@holiday.calendar.google.com/public/basic  
// USA Holiday calendar (ICAL link) http://www.google.com/calendar/ical/usa@holiday.calendar.google.com/public/basic.ics
```
