

International Partner Communication-Pixenate

Hey all! Welcome to the Pixenate International Partner Communication! This project is all about Pixenate- a photo editing and sharing site. I am very excited to work on this application and learn more about it. We have divided the roles up between the partners here at Purdue, and our International team members. We are essentially making a website that is all about Pixenate. There are multiple chapters that we have divided and each member of the team are contributing to. Some of the roles and responsibilities are to write the information in the wiki, how to set up videos, images and tutorials in the wiki, get some ideas as to sell our product, and evaluate our application very finely so that there are no errors. Our team members are: Paula, Andrea, Sara, Blake, Ashley, Hillary, Maggie, Galina, Irina, and Margarita.
