

How could the application be used within an educational situation?

How could the application be used within an educational situation? For example, generate multiple content area lesson plans for each of the following areas:

- 1) Elementary
- 2) Secondary
- 3) Post Secondary
- 4) Business/ Industry

Wordpress.org can be used in the post-secondary education by teacher and students whom need to collaborate on a group project. (Ben Hewitt)

Wordpress.org can be used in the secondary to post-secondary to have an online debate using two blogs. One blog supporting the topic and the other blog disagreeing with the topic. Students would be able to express their thoughts and feelings without participation in the actual class. (Ben Hewitt)

Wordpress.org would allow high school english students write and publish any kind of writing project. The project can then be shared or edited by international students gaining insight from other cultures. (Kyle Bischoff)
