Educational Value

What is the educational value of using this application?

- This aspect of the Microsoft Office Live is a way for teachers to put lesson plans and class activities online for others.
- Not only is it a place where teachers can post and purchase classroom material but Microsoft Office Live also has a feature that allows teachers to post questions or problems they have, and other teachers can communicate with them to help solve them. They branch out into many different areas, including geography, math, history, science and technology, language arts, and social studies. This seems to be a very useful aspect of this software for teachers to use.

How can teachers and students alike use this?

- There are many interesting things on the Microsoft Office education links. It is very helpful that there is a program for students who are struggling with math that can help them see the steps in solving equations.
- The One Note Program is a great way for teachers to share teaching materials with each other, and give out lessons to their students.
